NUANCE ACQUIRES SVOX***Combined Speech Technology Portfolios to Drive More Natural, Conversational Interactions with Cars, Mobile Phones and Consumer Electronics***

Burlington, Mass. – June 16, 2011 — Nuance Communications, Inc. (NASDAQ: NUAN) today announced that it has acquired SVOX, a provider of voice solutions for in-car systems and consumer electronics. The combination of Nuance and SVOX's innovations will advance the proliferation of voice in the automotive market, and accelerate the development of new voice capabilities that enable natural, conversational interactions between consumers and their connected cars, mobile phones, and other consumer devices.

The mobile industry is experiencing increased consumer demand to not only command and control in-car systems and devices through voice, but also to quickly and easily access mobile Web content, find local businesses, get directions, and create and listen to messages. Combined, Nuance and SVOX will further empower the world's leading car makers, automotive suppliers, device manufacturers and third-party developers to meet these demands head on, while customizing and differentiating their offerings with state-of-the-art voice innovations that result in the best mobile experience the industry has to offer.

"The automotive and consumer electronics markets are experiencing a surge in demand for voice capabilities," said Michael Thompson, senior vice president and general manager, Nuance Mobile. "By combining portfolios and expertise, we can ignite innovations that enable seamless, natural conversations between man and machine across an amazing portfolio of voices and languages."

The combined organization will deliver:

Advanced Voice Solutions for New and Emerging Markets – Nuance and SVOX's combined technologies will advance groundbreaking voice capabilities through robust text-to-speech and voice recognition offerings, as well as powerful hybrid cloud-embedded voice platforms. This resulting portfolio will enable incredibly natural and intuitive interactions never before thought possible with connected cars, a wide array of consumer devices and services, and the digital living room.

Strong Global Customer and Partner Relationships – The acquisition provides Nuance's and SVOX's customers and partners access to the industry's largest and most experienced mobile voice technology teams, delivering the broadest voice capabilities that enrich the automotive and mobile consumer experience. SVOX's technical expertise and talent combined with Nuance's global resources and market strength will enable technology platforms that are state-of-the-art today, while offering the assurance of technological leadership through a robust product and services roadmap.

"Manufacturers, suppliers, developers and consumers are all driving an unprecedented demand for fully voice-enabled experiences that require both embedded and cloud-based technology to work hand-in-hand. By combining our technology and talent with Nuance's robust voice capabilities and market strength, we'll be better positioned to meet that demand," said Martin Reber, CEO, SVOX.

SVOX's portfolio also supplements Nuance's advanced signal enhancement technologies, including echo cancellation and beamforming that enable increased voice recognition accuracy in automotive, mobile and digital home environments. Additionally, OEMs and developers will have access to a portfolio of plug-and-play application modules that enable them to fully voice-enable their innovations that feature the best of Nuance and SVOX's trusted voice recognition and text-to-speech capabilities.
